

MICROCROWN Flat Glass

MICROCROWN up-drawn soda-lime glass has one of the lowest iron contents known in the market today.

It has a high luminous transmittance and an excellent colorless appearance. MICROCROWN is available as sheet glass in a thickness of 1.0 mm.

Its unique composition makes MICROCROWN the right choice for microscopic slides where low auto-fluorescence and excellent chemical resistance are required.

Applications

Microscopic slides

- High transmittance
- Colorless appearance
- Good cosmetic quality
- Easy to cut by scribe and break
- Excellent flatness
- Resistant to chemical attack
- Low auto-fluorescence
- Good wettability on both glass surfaces

Technical Data

Dimensions	1560 mm x 560 mm
Thicknesses	1.0 mm, other thicknesses upon request
Luminous transmittance τ_{vd65} (d = 1.0 mm)	91.8 %
Coefficient of mean linear thermal expansion α (20 °C; 300 °C) (static measurement)	$9.4 \cdot 10^{-6} \text{ K}^{-1}$
Transformation temperature T_g	533 °C
Dielectric constant ϵ_r at 1MHz	7.0
Refractive index n_D	1.5229
Density ρ	2.55 g/cm ³
